The Healthier Alternative
in Nail Care

Bio Sculpture®

The Perfect Solution for beautiful nails.

Bio Sculpture Gel is the healthier alternative in nail care. Discover the difference of an advanced nail treatment that's a pleasure to use and wear.

Bio Sculpture Gel is a one component nail treatment that strengthens and promotes the growth of natural nails. It is a non chip coating applied to the natural nails to protect, condition and keep them strong. Nails look beautiful and feel flexible. It is self levelling and is easy to apply, drying in 2 minutes under a UVA lamp. Easy to remove it can be soaked off in 15 minutes without damage to the natural nail.

When I developed Bio Sculpture Gel I wanted a product that could be applied over natural nails, gel extensions, or artificial tips, that doesn't chip or wear away at the free edge. I wanted all this with a shiny, flexible, hard protection that gives a neat well groomed appearance.

Elmien Scholtz

Bio Sculpture® International

Leading Nail Care

Bio Sculpture® Colour Gel

Bio Sculpture Gel was the first Colour Gel worldwide and continues to be the number 1 selling Colour Gel internationally. Colour Gel is Clear Gel with pigment added. This not only gives the nail strength and flexibility but permanent colour. Available in over 150 beautiful fashion colours including French. Applied onto the natural nail, in a short time you will have perfect nails, non chip colour, shiny and glossy. **Available in 4g and 10g.**

Colour Stix

Easy to update and add new colours as the range grows, our Colour Stix are the best way to see the Bio Sculpture Colour range. Also available unpainted.

Always refer to your Colour Stix for a true indication of colour before ordering.

Bio Sculpture® Nail Polish

A fast drying, durable product. Contains double density florenated colour pigment to match our Colour Gels. Used during home care by clients to maintain their nails. Polish can also be painted on top of gel to give a temporary change of colour.

Gel Brushes & Tools

Deluxe Application Brush #4

Square application brush except French which is slanted for easy application. Available in several different designs – clear, pink swirl, black & gold swirl and French (white swirl). The handle is light weight perspex and is easy to hold and easy to clean. We recommend that you use the pink for light colours, black and gold for your dark colours and clear for treatment gels. It is important that you keep separate brushes for your s gel, flexi gel and uv top coat gel.

Deluxe Application Brush #6 (square)

Larger than the #4 this brush is perfect for those with a larger nail plate or for your uv top coat gel.

NEW Round Gel Brush #4

Just in, our new round gel brush to make your application flow more easily. Reaches corners and down the sides more easily.

Gel Stirrer

Always stir your colour gels before use. Best way to stir them is with our metal gel stirrer.

Stainless Steel Brush/Tool Rest

Perfect for resting brushes or tools on whilst working.

Brush Maintenance

- * After every client clean your brush with either Sanitizer
- * At the end of the day soak a piece of Wonderwipe in Dual Cleanser (or Acetone Free Polish Remover) and wrap around the top of the brush in tin foil. Lay flat. You will have the perfect brush the next morning.
- * If you brush is having a 'bad hair day' run it under hot water and the bristles will return to normal

Bio Sculpture® Gels

A one component system, Bio Sculpture Gel is quick and easy to apply. It is self levelling eliminating excess buffing and does not require the use of primers or bonders. Removed easily with Gel Remover without damage to the natural nail.

Flexible Gels

Clear Gel *Cure 2 minutes*

4g / 10g / 25g

- * Used as a base layer on prepared healthy natural nail
 - * Provides initial adhesion of product to nail plate
 - * Also used to saturate silk when doing a silk repair or nail biter extension
-

Sealer Gel *Cure 1 minute*

4g / 10g / 25g

- * Used as a final layer on soft nails
 - * Creates a flexible end result (soft damaged nails need flexible gel to move and flex with them)
 - * Ideally used for nail art – in wet uncured gel for flowers, hearts etc.
-

Sculpting Gel *Cure 2 minutes*

4g / 10g / 25g

- * Used as a base layer on a prepared damaged nail or corrugated natural nail as well as under Colour Gel
 - * Can also be used before tip application to protect against glue adhesion and buffing
 - * Has a natural nail colour
 - * Can be used to build a short, flexible sculpture extension
 - * Stir well prior to application
-

Colour Gels *Cure 2 minutes*

4g / 10g

- * Colour Gels not only give the nail added strength but are a permanent colour
 - * Dries instantly with curing
 - * Colour Gels grow out or last until removed
 - * Unlike polish Colour Gel will stay beautiful for weeks without chipping or wearing away
 - * Stir gel well before application
-

Medium Gels

Flexi Gels *Cure 2 minutes*

4g / 10g / 25g

- * Used as a finishing layer for medium to hard nails that will give a shine and a medium end result
 - * Used to build a flexible Upper Arch with ideal shaping properties
 - * Cannot be used as a base gel on natural nail plate
-

Non Flexible (solid) Gels

Free Edge Gel *Cure 2 minutes*

4g / 10g / 25g

- * An extension gel used to build a solid free edge with a natural free edge colour
- * Solid gels have a firm viscosity activated to a liquid under the application brush, by the movement and pressure of the bristles on the product
- * Free Edge Gel has the highest viscosity and when it is used in a drip-drag application there is no pressure and therefore no kinetic energy release
- * Free Edge needs this kind of energy release by stirring the gel in the jar before application.

S Gel *Cure 2 minutes*

4g / 10g / 25g

- * Used to build a solid upper arch that shapes easily
- * Can be used for extensions to build a solid clear free edge for nail art
- * Ideal for finishing French nails for a crystal clear finish that won't discolour
- * Cannot be applied as a base gel onto the natural nail

UV Top Coat Gel *Cure 40 seconds*

4g / 10g / 25g

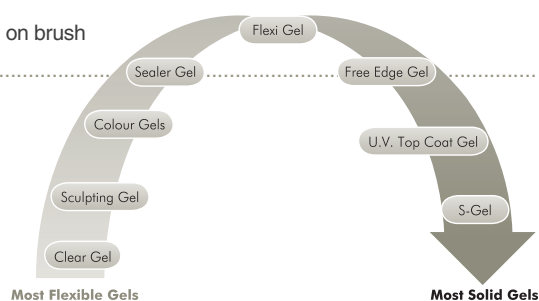

- * A thin finishing layer applied over flexible, medium and solid gel applications
- * Ideal when nail correction has been done after the finishing layer of flexi, s gel or sealer has been cured
- * Non-soakable, it must be buffed before soaking off. Do not apply too thick as this will cause lifting at the cuticle area

No.3 Snow White Gel *Cure 2 minutes*

4g / 10g / 25g

- * Best suited for hard, firm nails or sculptures and tips
- * Not suitable for soft or medium nails
- * It is a brighter white
- * Only requires one application
- * Not as flexible as other colour gels
- * Applied thicker and with little pressure on brush

Bio Sculpture® Starter Kit

Everything you need to get started with Bio Sculpture. Including a 2-day training course (1-day Conversion for experienced nail technicians only) we will teach you to get the best from our products to enhance your business.

- * Starter Kit contains:

 - * Technicians Manual
 - * PVC Kit bag
 - * Product Info Booklet
 - * 2-day Gel training course
 - * A2 Poster *
 - * Assessment/Exam with certificate & badge *
- * **On condition of passing assessment**

Bio Sculpture® UV Lamps

UV Lamps

Available in black and white

UV Lamps Maintenance

Place a square piece of tinfoil or paper towel in bottom of lamp to protect from gel marks
Use Sanitizer to clean outside of lamp – never Gel Remover as this will remove the shine
Replace UV Bulbs regularly to ensure efficient and proper curing.
Change bulbs every 500 hours. They do not 'go out' they just stop curing your gel.

TIP – write the date on a sticker and place under your lamp so you don't forget!

UV Bulb

UV Protection Gloves

For clients with skin conditions who may want extra protection. To be worn whilst client is having treatment, they will protect the skin on the hands from the UV rays that cure the nails.

Introducing Bio Sculpture® Luxury Spa Range

With many salons changing their image and following a more holistic spa approach, Bio Sculpture is delighted to introduce their new Spa Range. This range is aimed at giving clients a more pampered and relaxing experience. When a client books in for a nail treatment you can now offer them a luxurious treatment that will guarantee they come back again.

Bio Sculpture® Luxury Spa Range

Hand Cream

100ml

Containing essential oils that nourish and regenerate skin cells. The UV sun-filter protects the skin from premature ageing and nourishes, leaving hands moisturised and soft.

Hand & Body Lotion

500ml including pump

Made with grape seed oil and essential oils to nourish the skin.

Hand Wash

100ml & 500ml with pump

A liquid soap containing essential oils that leave the hands clean and soft. Technicians as well as clients must wash hands before and after treatments.

Potpourri Salt Scrub

250ml / 750ml

Containing rose petals and a beautiful geranium fragrance this rich salt scrub is applied to wet skin. Massage gently in circular movements. Rinse with warm water.

Potpourri Aqua Soak

250ml / 750ml

Add to your manicure bowl and foot spa. Sprinkle this fresh citrus fragranced soak into water bowl and lather.

Cuticle Cream

20ml

Containing essential oils to improve, nourish and soften the cuticles and skin around the nails. It will also nourish dry and brittle nails and help to prevent cracking of cuticles, skin and nails.

Heel Balm

100ml / 250ml / 750ml

Containing organic compounds and plant extracts, our Heel Balm softens hard calluses and dry, cracked heels. Apply liberally twice daily and massage into heels and foot soles. Cover feet to help with absorption.

Hand & Body Butter

100ml / 250ml / 750ml

A rich massage cream that contains essential oils and is used during manicure and pedicure treatments. Ideal for very dry skin on hands, arms, legs and décolletage.

Apricot Kernel Scrub

100ml / 250ml / 750ml

This light abrasive scrub contains tea tree leaf oil for manicure and pedicure exfoliation. Massage in circular movements for 5 minutes to remove dead skin cells from hands and feet. Rinse with warm water.

Mint Mask

100ml / 250ml / 750ml

A cool and nourishing mask containing peppermint and eucalyptus oil. Apply to hands and feet and leave on for 10 minutes. Wipe away excess product. To experience an extra cooling effect, leave on for a further 10 minutes. Sponge with warm water to remove remaining product.

Spatula

Bio Sculpture® Treatment Products

Executive Base

Toluene and Formaldehyde free, this is a multi functional conditioning base that compresses the nail keratin to strengthen soft nails. Do not use on flaky or brittle nails. Great as your base layer before a manicure. For use before gel, only apply a thin layer to the centre of a prepared natural nail. For use before manicures, apply to whole nail.

Top Coat

Toluene, DBP and camphor free, Top Coat contains a sun filter that protects the gel against light aggression. Fast drying, the top coat adds shine and lustre to the finished nails when applied over Clear and Coloured nails. Used by clients for home maintenance to top up the shine on their nails.

Anti Fungal

Used to prevent and dry out fungal infection and nail mould. Spray during preparation of nails.

Cuticle Oil

Formulated with Almond Oil, Jojoba Oil, Avocado Oil and Vitamin E, the Cuticle Oil rehydrates the nail plate and cuticle. Massage regularly into the nails to balance oil/moisture levels of the nail plate. Always used at end of treatment. Must not be used before gel application.

Almond Exfoliator

Containing mini Almond Kernels this product exfoliates the skin on and around the nail and cuticles. It is formulated with the intent on sloughing away the dead cells and stimulating growth in the nail bed cells whilst offering a aromatherapeutic aspect. Used after Cuticle Remover or before a Spa manicure scrub.

Vitamin Dose

This product moisturises, rejuvenates, strengthens and nourishes the nail bed. It is a unique form of vitamins that is applied directly onto the nail bed. Vitamin Dose applied onto or under cuticles can cause lifting when applying gel. Allow liquid to absorb into nail. The nail cells will open to receive the vitamins.

Lavender Base

Enriched with Lavender essential oil, this product helps add moisture to brittle, dry and flaky nails. Cannot be used under gel however it is a great treatment for the nail as well as a base coat before a manicure. Ideal for use on nails recovered from fungal infection or from sore incorrect treatment. Best used with gel in Lavender Base Treatment.

Lavender Base Treatment

This is not a strengthening gel overlay but a nourishing treatment for nails that need it. The white gel will seal the nail plate layers in the front of the nail whilst the Lavender Base hydrates and treats the damaged nails.

1. Apply thin layer of Clear Gel only on free edge (1mm higher than where you will apply No.1 White). Cure.
2. Apply one (or two if necessary) layer of no.1 White, curing between layers.
3. Apply Sealer Gel just covering the French smile line. Cure.
4. Dual Cleanse to remove sticky residue on free edge.
5. Shine nail with shiner.
6. Apply vitamin Dose onto nail and cuticle. Leave to absorb.
7. Apply 2 coats of Lavender Base. Allow to dry.

After 1 week remove Lavender Base with Dual Cleanse and redo Vitamin Dose and Lavender Base steps. Remember to also use Cuticle Oil regularly.

Cuticle Conditioner

Available in 10ml and 50ml refill.

Containing blue Jojoba beads, the cuticle conditioner is formulated with Tea Tree Oil, Lavender extract and various active ingredients in bead form. Massage into fingertips after Gel Removal and before washing hands.

Cuticle Remover

Available in 10ml and 50ml refill.

Used to soften and lift stubborn skin on nail and around cuticle area. Apply, wait one minute then gently remove loosened skin with metal cuticle pusher.

Bio Sculpture® Solutions

Formulated for compatibility with all Bio Sculpture products

Nail Polish Remover

100ml / 250ml / 1L

Acetone Free it will not cause any harm to your gel. Use to remove polish, Top Coat and Executive Base.

Dual Cleanser

100ml / 250ml / 1L

A multi-purpose solvent with no oil, it is used to clean and prepare the nail plate before application and to remove sticky residue after application. Also used to remove polish, top coat, cuticle remover and loose skin and filings as well as oil and water on the nail. An alternative to Nail Polish Remover and Sanitizer as it does the job of both.

Sanitizer

100ml / 250ml / 1L

Used to remove traces of oil from the natural nail in preparation of Gel Overlay. Also removes sticky residue at end of application.

Gel Remover

100ml / 250ml / 1L

Used to remove gel from the nail, the Gel Remover softens and breaks down the bond releasing the gel from the natural nail without damage.

Quick Dry

100ml / 1L

Allow nail polish or top coat to 'settle' for 1 minute before spraying. Nails dry to touch in 2 minutes.

Antiseptic Moisturising Gel

500ml

Cleans and disinfects hands whilst leaving them soft and moisturised. For salon use.

Techniclean

100ml

As with the 500ml Antiseptic moisturising gel but a retail size for clients.

Dilute

100ml

Used to replace solvent loss in Executive Base and Nail Polish which can evaporate with time, if left open for long periods or if bottle not done up properly due to excess product at the bottle neck. Only a few drops needed.

Barrier Cream

100ml

Helps protect and re-hydrate sensitive skin.

Pump Dispenser

100ml

Fingertip vacuum pump, easy to use and no more leaks or spills. Great for cleaning your application brush.

Spray Pump

Available for 100ml & 250ml solution bottles

Bio Sculpture®

The Perfect Solution for beautiful nails.

A healthy treatment that's a pleasure to use & wear

Bio Sculpture Gel is a non-chip coating that is applied over natural nails to protect, condition & keep them strong. Nails look beautiful & feel flexible. It is easy to apply & dries instantly soaking off in 15 minutes.

Easy Application. Dries Instantly

Bio Sculpture Gel is easy to apply over natural nails, tips or as sculptured extensions & is compatible with other nail systems. No fumes. No odour.

No damage to natural nails

Bio Sculpture Gel promotes the growth of your nails, keeping them healthy. Unlike other nail treatments, there is no buffing on the natural nail. Leaves a smooth finish on ridged nails.

Permanent Polish - No more Chips

A choice of over 150 beautiful colours including clear & french. Chip proof & long wearing - you will keep a manicured look long after your treatment.

Condition your nails

Our range of treatments (found overleaf) can help maintain beautiful nails. Executive Base (nail hardening treatment), Lavender Base, Cuticle Conditioner, Cuticle Oil, Almond Exfolier, Vitamin Dose, Hand Cream & Cuticle Cream are always available.

Don't forget Pedicure!

Great on toes! Bio Sculpture Gel has a full range of spa pedicure products. Ask your technician for details. Pamper your feet!

Please note, some products may vary slightly from images shown.
